##### My View on Eating in the Classroom

In recent years, there is a growing tendency that an increasing number of people, especially college students, are eating food, particularly their breakfast, in their classrooms, which has aroused a heated discussion about this phenomenon.

People rarely reach an absolute consensus on such a controversial issue. Some people support this behavior for the reason that it can save them time, while others are against this habit.

From my point of view, I am in favor of the latter one. The reasons are as follows. First of all, it is apparent that eating food in the classroom will pollute the environment, which makes the classroom smelly. What's more, no one can deny the fact that this behavior will damage students' appetite, because those who eat food in the classroom are always in a hurry. We'd better get up a little earlier and take our time to eat our breakfast.
